Informacje o bezpieczeństwie

List of safety warnings for ventilation grilles based on the requirements of Regulation (EU) 2023/988 on general product safety (GPSR). * Make sure the ventilation grilles are properly mounted to avoid them loosening or falling out, which could cause injury. * Regularly check that the ventilation grilles are not damaged or rusted. Damaged grilles can be a threat. * Keep ventilation grilles clean to ensure proper airflow and avoid the growth of mold or other harmful substances. * If you use metal ventilation grilles, be careful when cleaning or disassembling them to avoid cuts with sharp edges. * When using ventilation grilles in public places or public buildings, make sure they are protected from unauthorized access to avoid acts of vandalism or damage. * If the ventilation grilles are located in areas exposed to water, make sure they are made of corrosion-resistant materials. * For grilles with moving parts, regularly check that they are working properly and that there are no locks. * If ventilation grilles are placed in the floor, make sure they are sufficiently durable to avoid damaging them or collapsing under weight. * Do not place grilles in flammable places.
