SCHMITH Pas transportowy 5m 38mm 2T

Cena	**25,00 zł**
Numer katalogowy	**ALP-17752743014**
Kod EAN	**5902004713021**

Opis produktu

Parametry produktu

- **Stan:** Nowy
- **Numer katalogowy producenta:** SCH12R02001
- **Producent:** Schmith
- **Rodzaj:** linki, pasy transportowe
- **Szerokość produktu:** 3.8
- **Długość:** 5
- **EAN (GTIN):** 5902004713021

Informacje o bezpieczeństwie

List of safety warnings for luggage compartment organizers and nets based on the requirements of General Product Safety Regulation (EU) 2023/988 (GPSR): * Make sure that the organiser or net is properly fixed in the luggage compartment to prevent sliding while driving. Unprotected items can pose a hazard in the event of sudden braking or collision. * Do not overload the organizer or net above the permissible weight. Overload can cause damage to the product or vehicle and also pose a safety risk. * Avoid storing sharp or flammable items in organizers or nets, which can pose additional risks in the event of an accident. * Regularly check the technical condition of your organizer or mesh, including seams, fastenings, and other items. Replace damaged products with new ones to avoid danger. * Keep your organizer or mesh clean to prevent the growth of bacteria and mold, especially if you store food or other organic products in them. * Do not allow children to play near organizers or nets, especially when they are filled with items. There is a risk of injury or ingestion of small parts. * Choose organizers and nets made from non-toxic materials that are safe for your health. Avoid products that contain harmful chemicals that can be released in the enclosed space of the trunk. * Do not modify the design of the organizer or mesh yourself, as this can weaken its structure and increase the risk of failure. * If the organizer or net is equipped with mounting hardware such as straps or hooks, make sure they are properly fastened and do not wear out. * For products with reflective elements, check their condition regularly to ensure good visibility in low light conditions.
