Informacje o bezpieczeństwie

List of safety warnings for stools and stools based on the requirements of General Product Safety Regulation (EU) 2023/988 (GPSR): * Stability: Make sure the stool or stool is stable on the ground. Unstable alignment can lead to falls and injuries. * Durability: Do not exceed the maximum load on your stool or stool. Overload can cause damage or breakage, leading to a fall. * Sharp edges and protruding elements: Check that the stool or stool does not have sharp edges, burrs, or protruding elements that could cause cuts. * Folding mechanism (if applicable): If the stool or stool has a folding mechanism, make sure it is functional and locked during use. Improper locking can cause the stool to suddenly fold and fall. * Child-friendly use: Do not allow children to jump or swing on stools and stools. This can lead to loss of balance and collapse. * Terms of use: Do not use stools and stools outdoors if they are not intended for this purpose. Adverse weather conditions can affect their durability and stability. * Maintenance: Regularly check the condition of stools and stools, tighten screws, and replace worn-out components. Negligence of maintenance can lead to damage and dangerous situations. * Cleaning: Clean stools and stools according to the manufacturer's instructions. Using the wrong cleaning agents can damage the surface and weaken the structure of the material. * Storage: Store stools and stools in a dry and safe place, away from heat and fire sources. Improper storage can affect their durability and stability. * Bar stools: Take extra care when using bar stools, especially if they are high. Make sure you have a stable backrest and keep your balance. * Assembly: If your stool or stool requires self-assembly, follow the step-by-step instructions. Incorrect installation can affect the stability and safety of use.
