TARCZA DO METALU INOXLINE
TOP BERNER 125X1,0X22,23
DO STALI NIERDZEWNEJ

Cena	5,50 zł
Numer katalogowy	ALP-17821158297
Kod producenta	38500
Kod EAN	4039286934637

Opis produktu

Berner Tarcza do stali nierdzewnej INOX

- Średnica otworu: 22,23 mm
- Średnica zewn.: 125 mm
- Grubość: 1 mm
- Maks. prędkość obr.: 12220 r/min
- Wymiar: 125 x 1 x 22.23 mm
- Stale stopowe, wysokostopowe i nierdzewne, stal nierdzewna
- Stal zwykła
- Blacha metalowa
- Pleksiglas do 4 mm
- Wszystkie realizacje w zakresie cięcia stali nierdzewnej i metali
- Wiele różnych średnic i grubości
- Bez utleniania podczas cięcia stali nierdzewnej
- Bez żelaza, siarki i chloru
- Dobry stosunek: wydajność/żywoćność
- Wykonane z dobrych komponentów

Parametry produktu

- **Stan:** Nowy
- **Kod producenta:** 38500
- **Marka:** Berner
- **EAN (GTIN):** 4039286934637

Informacje o bezpieczeństwie

List of safety warnings for cutting discs based on the requirements of General Product Safety Regulation (EU) 2023/988 (GPSR): * Use cutting discs only for their intended purpose. Do not use them for materials other than those for which they are designed. * Check the disc for damage, cracks, or deformation before each use. Do not use a damaged shield. * Put on and take off the discs only when the tool is turned off and disconnected from power. * Use discs with the right diameter and mounting hole to fit your tool. * Always use protective covers designed for your tool and shield. * When cutting, wear appropriate personal protective equipment such as safety glasses, dust mask, earmuffs and gloves. * Make sure the

workpiece is firmly fixed to prevent it from moving during cutting. * Do not apply excessive pressure to the disc when cutting. Let the tool work at the right speed. * Avoid overheating the disc. For longer cuts, take breaks to keep the disc cool. * Once the job is done, wait for the dial to stop completely before putting the tool down. * Store shields in a dry and safe place, away from children and unauthorized persons. * Pay attention to the marking of the discs, including the maximum rotational speed and manufacturer's recommendations. * Do not use discs that have exceeded the expiration date if stated by the manufacturer. * If you change the disc, make sure that it is properly fixed and protected against accidental loosening during operation. * Regularly clean and maintain the tool to ensure its proper operation and safety of use. * Avoid working in areas with high humidity or in the presence of flammable substances. * Make sure that bystanders are at a safe distance from the workplace when cutting. * After cutting the metal, wait for the filings to cool down so as not to burn.
