WĄŻ OGRODOWY 4-WARSTWOWY PREMIUM MOCNY ZBROJONY 1/2 CALA 50M UV

Cena	79,49 zł
Numer katalogowy	ALP-17285325491
Kod producenta	SGWO412-50
Kod EAN	5902004748368

Opis produktu

WĄŻ OGRODOWY 1/2" 50M 4-WARSTWY

Wytrzymały wąż Schmith. Możliwość długoletniego użytkowania dzięki dużej wytrzymałości. Przeznaczony do średniego użytkowania w ogrodzie o strukturze np. trawnika, płyty kamiennej, żwiru.

- Klasa PREMIUM
- podwyższona jakość i wytrzymałość
- Rozmiar 1/2 cala x 50m
- Zakres temperatur użytkowania: - 10st. C - +50st.C
- 4-warstwowy
- Odporny na promienie UV
- Odporny na osadzanie się glonów
- Odporny na ciśnienie rozrywające do 20 BAR
- Wzmocnienie z przędzy najwyższej jakości

Parametry produktu

- **Stan:** Nowy
- **Stan opakowania:** oryginalne
- **Kod producenta:** SGWO412-50
- **Marka:** Schmith
- **Typ:** wysokociśnieniowe
- **Długość:** 50
- **Średnica:** 12
- **Średnica w calach:** 0.5
- **EAN (GTIN):** 5902004748368

Informacje o bezpieczeństwie

List of hose safety warnings based on the requirements of General Product Safety Regulation (GPSR) 2023/988 * Use the hose as intended. Do not use the hose for purposes for which it is not intended, e.g. for the transmission of chemicals if it is not adapted to do so. * Check the hose before use. Make sure that the hose is not damaged, cracked or rubbed. A damaged hose can break under pressure and cause injury. * Do not exceed the permissible pressure. Use the hose according to the permissible working pressure. Too high pressure can cause the hose to break. * Protect your hose from sharp objects. Avoid dragging the hose over sharp edges or objects that can damage it. Don't leave the snake in the sun. Prolonged exposure to the sun can cause the snake to weaken and crack. * Empty the hose from the water after use. Leaving water in the hose, especially during the winter, can lead to its freezing and damage. * Store the hose in the right way. Roll up the hose and store in a place protected from the sun and extreme temperatures. * Beware of connectors. Make sure the connectors are properly fastened and tight. Leaky joints can cause water loss and reduce pressure. Don't drink water from a snake. Snake water is not drinkable and may contain harmful substances. * Protect the hose from children. Children should not play with a snake without supervision. They can inadvertently damage the hose or injure themselves. * Beware of electrical hoses. If you use a hose for irrigation near electrical appliances, make sure that the hose is insulated and does not conduct electricity. * Do not twist the hose. Avoid twisting the hose, as this can limit the flow of water and damage its structure. * Do not use hose to carry flammable liquids. Using a hose contrary to its intended purpose can cause an explosion or fire. * Conduct regular snake inspections. Check the condition of the hose regularly for damage, leaks or other problems. Regular inspections help to keep the hose in good condition and prolong its service life. * Avoid excessive bending of the hose. Bending the hose too hard can lead to it breaking or blocking the flow of water.
