- **Kształt:** okrągłe
- **Waga produktu z opakowaniem jednostkowym:** 0.5
- **Kolor:** niebieski
- **Cechy dodatkowe:** brak
- **EAN (GTIN):** 3253923206043

Informacje o bezpieczeństwie

List of bucket safety warnings based on the requirements of General Product Safety Regulation (EU) 2023/988 (GPSR): 1. Stability: Make sure the bucket is stable, especially when it is full. Flipping the bucket can cause spillage of contents and potential accidents. 2. Load: Do not overload the bucket beyond its maximum capacity. Excessive weight can cause damage to the handle or walls of the bucket, leading to its fall. 3. Heat: Avoid storing the bucket near heat sources or open fire. Some

of the materials from which buckets are made can be flammable or deformed under the influence of high temperature. 4. Chemicals: When using a bucket to store or mix chemicals, make sure the bucket material is resistant to these substances. Always follow the manufacturer's recommendations for use with specific substances. 5. Children: Do not leave a bucket of water or other liquids in a place accessible to children without supervision. There is a risk of drowning, even in a small amount of water. 6. Hygiene: Clean the bucket regularly, especially if you use it to store food or drinking water. This prevents bacterial growth and contamination. 7. Damage: Regularly inspect the bucket for damage, such as cracks, sharp edges, or damaged handles. A damaged bucket can be dangerous to use. 8. Disposal: Dispose of used bucket in accordance with local recycling and environmental regulations. Some materials require special disposal. 9. Moving: Be careful when moving the bucket, especially when it is full. Use both hands and maintain proper posture to avoid injuries. 10. Storage: Store buckets in a safe place where they won't interfere with passage or pose a tripping hazard.
